

THE BLAIRMORE ENTERPRISE

VOL. XVIII., NO. 35.

THE BLAIRMORE ENTERPRISE, THURSDAY, SEPTEMBER 1, 1927.

\$2.00 PER ANNUM

Mr. C. J. Tompkins, local district agent for the Sun Life Assurance Company, left here on Friday night for Detroit, where he attends the annual convention of the company's representatives. Following a few days in Detroit, Mr. Tompkins will visit his old home and other points in the Maritime Provinces.

The ratepayers of the town of Hanna, Alberta, voted down a proposition to raise the sum of \$15,000 for the purpose of building cement sidewalks—the most backward step in the history of that town. Not more than four percent of the ratepayers took the trouble to exercise their franchise.

BLAIRMORE S. HIGH RE-OPENS FOR THE FALL TERM

Blairemore's public and high schools re-opened for the fall term on Monday morning with the following staff: Principal, Donald McPherson; vice-principal, Eric Munroster, B.A. Grade VII; Miss Catherine Crystal, B.A.; Grade VIII, Miss Kathleen Tompkins; Grade VI, Mrs. Dorothy Tompkins; Grade IV, Miss Myra Hyson; Grade IV, Miss Sarah McVeigh; Grade III, Miss Lydia Brunetto; Grade II, Mrs. Braverman Pozz; Grade I, Miss Ardenland; Grade I, beginners; Mrs. Fleming; Grades I, II, and III, west end, Miss McPherson McDonald.

The opening enrollment is as follows:

Son or high school, 34; junior high school, 42; Grade VIII, 37; Grade VII, 43; Grade VI, 42; Grade V, 54; Grade IV, 44; Grade III, 37; Grade II, 45; Grade I, 24; Grade I, beginners, 22; West Ward, Grade I, II, and III, 25. Present total enrollment 449.

BELLEVUE FLOWER SHOW ON MONDAY NEXT

The Bellevue and District Horticultural, Industrial and Poultry Society will hold their tenth annual exhibition in the arena at Bellevue on Monday next, Labor Day, from 1 p.m.

In connection with the exhibition there will be the usual sports programme, which will include a five-mile marathon road race.

The exhibition this year judging by the splendid gardens to be seen in and around Bellevue and Hillcrest and the very large number of entries, will be far ahead of any previous show. A visit to the gardens before they are culled for the exhibition would be well worth while.

On Monday, eight, the Bellevue Branch of the Canadian Legion, B.E.L., will open their three-day carnival in the arena.

THE DEATH OF JAS. G. EWAN

In connection with the death of Mr. James G. Ewan, the following particulars have been received from Victoria:

He had complained of not feeling well for a week or so and when examined by a doctor, was sent to hospital for X-ray treatment, but on going there, the doctor found that he had an advanced cancer trouble and X-ray treatment would be useless. All they could do was to allay the pain and he suffered terribly, death indeed being a merciful relief. The funeral service was conducted by Rev. Canon Stetson, of Esquimalt, the remains were laid to rest at Rose-Bay cemetery, with Mr. James Finlay, Mr. Robert Cummings, Mr. W. J. Archer and Mr. William Powell, all old-time Pass people, acting as pall-bearers. The undertakers also had been in Blairemore and came from Calgary, viz: McCall Brothers. Mr. Ewan leaves a wife and three boys, George, aged 16; Gordon, 9, and Donald, 6. He has two sisters and one brother residing in England.

AT THE UNITED CHURCH

The evening service at the United church on Sunday next will take the form of a flower service. The senior choir will render two selections. Also Messrs. A. Phillips, baritone, of Coleman, and A. Hadwell, tenor, of Bellevue, both popular singers, will appear. They need no introduction and no doubt will attract a crowded house. Rev. Mr. Smith will be the preacher.

A story comes from Newfoundland that a man, named Mills, of Sleepy Cove, on cutting open a codfish was surprised to find two boiled potatoes and a slice of pork, all quite fresh looking, supposed to have been thrown overboard from a passing steamer on Friday.

FRANK HOME TWICE VISITED BY DEATH

The Wintgens home at Frank has been twice visited by death within a week. On Thursday of last week, Mr. Cornel Wintgens, aged fifty-five, met death by drowning in a near gey near the home, and on Thursday of this week, five and a half days following, Mrs. Mary Wintgens passed away at the age of sixty-four.

Mrs. Wintgens had for a long time been suffering from partial paralysis. Since the death of her husband she had remained in a state of unconsciousness until the end came at 7 o'clock on Tuesday evening.

Funeral takes place on Saturday from the Frank home at 9:30 a.m., and a Reunion Mass will be said at St. Anne's church, Blairemore at 10:30, following which the remains will be laid to rest beside those of her husband.

With the two surviving daughters general sympathy is extended.

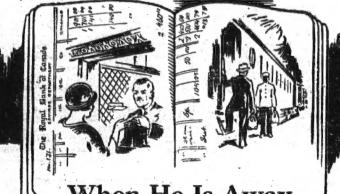

CARD OF THANKS

The two surviving daughters of the late Mr. and Mrs. Cornel Wintgens desire to thank the many friends who offered assistance and expressed sympathy with them in the loss of their dear parents. The following floral tributes are hereby acknowledged: Heart: Mr. Charles Sartoris; "Gate Agar." The Family; wreaths, Belgian Friends; Mr. and Mrs. William Antel, Coleman; Mr. and Mrs. R. Belli, Blairemore; Mr. and Mrs. J. Milnes and Mrs. Goodwin, Bellevue; Mr. John Frederickson, Blairemore, Sprays, Mr. and Mrs. T. Pirolo, Frank; Mr. and Mrs. R. W. H. Pickney, Blairemore; Mr. and Mrs. P. Chardon, Blairemore; Mr. and Mrs. F. M. Thompson, Blairemore, Flowers, Mr. and Mrs. Gillian and Mr. and Mrs. Geddes.

The manliest trap watch ever made

In the new Imperial Tank model, the Gruen Watch Makers Guild has produced a strap watch of virile masculinity. Its sturdy 14kt gold case is fitted with a Guild movement that assures dependable timekeeping service. See this and other Gruen Strap and Pocket Watches at our store. Priced from \$25 to \$250.

FREE STATE TO HOLD ELECTIONS IN SEPTEMBER

Dublin.—Swiftly following two great election victories, the Chegare Government threw a bombshell into the political situation in the shape of a proclamation calling for the immediate dissolution of the Free State Legislature and for a general election which will be held about the middle of September.

As soon as the results of the two by-elections, upon which the Government had staked its existence, were known, the executive council met and decided to take full advantage of the present favorable situation for the administration's policy, and Governor-General Healy to proclaim dissolution of the present Dail Eireann.

This course, which caused tremendous surprise in political circles, will it is felt, prevent a permanent right from the weak position shown by the polling figures in the two by-elections in Dublin County. There has been some doubt about the legality of the Government's course, since it was generally believed the Government would require the assent of the Dail to justify dissolution, but it is assumed the ministers have taken legal advice on the constitutional position.

The results of the by-elections to fill the vacancies caused by the deaths of Vice-President O'Higgins and the Countess Marley, showed that overwhelming defeat had been inflicted upon the Republican Party. Gerald O'Sullivan, running to fill the vacancy caused by the assassination of Vice-President O'Higgins, received 1,000 votes for the Government party by a plurality of more than 12,000, polling 31,995 votes to 16,126 for Robert Brennan, de Valera candidate, and 1,532 for Dr. Kathleen Lyon, Sinn Fein nominee.

Increase Of Orientals In B.C. Industries

Over One Thousand Added To Employment Registers Last Year

Victoria—An increase in increasing their grip on British Columbia industries, according to a survey conducted by the Provincial Government.

From 1130 per cent. of the total industrial population in 1925, Orientals increased to 115 per cent. last year. With the total number of industrial workers in the province increasing rapidly, the fact that the Orientals more than held their own during the period under review is regarded as all the more significant. According to the government figures, 1,395 Orientals were added to the employment registers last year.

The figures disclose that Canadians and people of British origin represent 70.2 per cent. of the industrial population of continental Europe 15.62 per cent. and people of other countries 1.2 per cent.

The increase in Asiatics is mainly in Chinese although, Japanease, particularly females of that nationality, figure more prominently in the returns.

Troops In Rhineland May Be Reduced

Expect French Forces Will Be Cut To 50,000 Shorty

Paris.—The readjustment to circumstances of the allied troops of occupation in the Rhineland is on the verge of conclusion, it was semi-officially learned at the Quai d'Orsay.

Conversations between Great Britain and France have been going on for several weeks concerning decreasing the force of occupation, and it is expected that the French troops on the Rhine will be cut to 50,000 within a fortnight.

Would Leave Ireland Alone
Sydney, N.S.—"Our duty to Ireland at the present time is to leave her alone," declared Treasurer Haley, of Chatham, N.B., addressing a public meeting at the 24th annual convention of the Ancient Order of Hibernians of New Brunswick and Nova Scotia. Mr. Haley referred to the fight for self-determination in Ireland a few years ago, and declared that the fight had been won. The Irish people had achieved the same degree of self-determination as existed in Canada. Their sympathizers in Canada might now leave them to work out their own destiny.

Execute Woman In Moscow
Moscow, June 21.—Klispuk, sentenced to death last month in a court martial at Kronstadt, was executed, the central executive committee of the Soviet having rejected an appeal for remission of sentence.

W. N. U. 1686

Exchange Of Radio Programs

Proposal Made By Engineer Of British Broadcasting Company

New York.—An engineer of the British Broadcasting Company, announced at a luncheon in London that he intended to visit this country in September to begin negotiations which he believes will result within a year in a regular exchange of English and American radio broadcast programs.

Eckersley's announcement, made at a luncheon of the Radio Manufacturers' Association of Great Britain in London, was relayed here by radio telephone and received by American radio men breakfasting in a New York apartment.

Bears Were Friendly

Lord Chief Justice Of England Interested In Bears At Banff

Toronto.—Lord Justice of Appeal, Sir Edward, chief justice of Ontario, said the Banff bear had been the high light of his trip from Quebec to the Rockies and back, when he arrived here to attend the meetings of the Canadian Bar Association.

"The bears came to the side of our car and begged for chocolate," said the jurist just. "We fed them and they posed for their photographs." He was surprised to hear that a woman had been attacked by one of these bears. "They were most amiable to us," he assured his interviewer.

Open Game Reserve

Opportunity To Be Given Tourists In South Africa To See Fauna At Close Quarters

Cape Town, South Africa.—The Cape Town Game Reserve, of South Africa, consisting of 300 square miles of virgin land, is to be opened to tourists. The national board of trustees met at Komatipoort to consider building roads within the reserve. An experimental road 37 miles long already has penetrated the heart of the bush.

The scheme follows the suggestion of a visitor. "When worked out it will enable people to see the African fauna at close quarters in safety, something that has not been possible before."

Another World's Record

German Aviator Flew Upside Down For Ten Minutes

Paris.—A German aviator named Pfeifer has set a world record in topsy-turvy flying, according to dispatches from Geneva. Pfeifer, leaving from the Zurich Flying Field, circled head downward, under observation of official witnesses, for 10 minutes 58 seconds.

After resuming normal flight for several minutes the pilot landed without difficulty and apparently unaffected by giddiness.

Wins Editorial Contest

Montreal—H. P. Davidson, of Acadia, Wolfville, N.S., won the contest entitled "The National Contest" for the celebration of the diamond jubilee of Confederation to determine the best editorial appearing in weekly newspapers dealing with Confederation and the progress of Canada. Mr. Davidson's editorial was entitled, "Canada's Greatness." Honorable mention was given to the Covichian Leader, Duncan, B.C., for its editorial, "O Canada."

B.C. Liquor Profits

Victoria.—Total profits made through liquor handled by the British Columbia Liquor Control Board reached \$1,913,872 for the six months' period ending March 31, it was announced here. Of this amount \$534,506 went to the various municipalities, the largest distribution ever made by the Government since Government liquor control was inaugurated. Profits for the six months' period ending September 30, 1926, were \$1,361,000.

Worried Over Payroll

Omaha, Neb.—Comes from Clarence Chamberlin, trans-Atlantic liner, a story that Charles A. Levine, was more worried about a roll of bills on their trip than about himself. He forgot to leave the money behind for his payroll. "When he thought of it," Chamberlin relates, "he shouted in consternation, declaring he certainly hated to go into Davy Jones' locker with all that money on him."

Discusses Law Society Matters

Toronto.—Representatives of the governing bodies of the legal profession in Canada met at Osgoode Hall to discuss matters of interest to the law societies of Canada. Hon. N. W. Howell, K.C., presided and addresses were delivered by Lindley Crease, F.C.A. of Victoria; B.C. D. J. Thom, K.C. of Regina; Dean Read, of Dalhousie University, Halifax; and Dr. D. A. Macrae, of Osgoode Hall, Toronto.

Newspaper Men Meet At Geneva Conference

To Study Some Problems Connected With Their Profession

Geneva.—The men who are managing the news agencies and the newspapers of the world gathered at Geneva, under the auspices of the League of Nations in an international conference to study problems connected with their profession. Improvement in the means of communication, telegraphs, telephonie, and wireless, more reasonable rates for the transmission of news, better facilities in the collection of news, the removal of censorship in peace time, and examination of the general problems of the legal protection of press information were subjects on the agenda.

The Canadian Press was represented by Hon. Frank Carrel, publisher of the Quebec Chronicle Telegraph.

Carried Latest News To British Editors

Airplane Took Press Despatches To Visitors At E.P.C. Ranch

Calgary.—No master where news papers are they must have the news. Even when the party of British editors detained at High River and in automobiles for the Prince of Wales' ranch, which they believed to be far off in the foothills and avoided by most of the visitors, found the nearest station, an airplane from the forest patrol at High River pursued them and after their arrival at the ranch dropped them to the latest Canadian Pacific despatcher, giving them all the most important information of the world's affairs.

SURVEYING NEW H. B. LINE TO FORT CHURCHILL

Winnipeg, Man.—To speed up the work of surveying the territory through which the Hudson's Bay Railway will pass, from the end of the present steel to the proposed terminal at Fort Churchill, three engineers from the Department of Public Works at Ottawa, arrived in Winnipeg en route for the north.

Accompanying the engineers was a small party of special craftsmen and their way to Le Pas, Manitoba, about 200 miles west will be engaged.

Some of the party will proceed to Port Nelson to commence the work of removing as much of the harboring material as can be used at Fort Churchill.

Another group of men will start on the preliminary survey for the harbor development at the new terminal.

It has been decided by the Government, as announced by Hon. Charles A. Dunring, Minister of Railways and Canals, that the work shall be advanced as expeditiously as possible and to this end work which can be done before the fall freeze-up is being rushed. Early next spring, just as soon as possible after the snow has melted, an army of workmen will follow the coming world war.

Anual Sheep And Swine Show

Victoria.—The annual sheep and swine show and sale will be held at the exhibition grounds here on November 1, 2 and 3. The show will be held in Saskatoon preceding its appearance here, on October 27 and 28. Some excellent prizes have been offered, including specials by breeders' associations.

Will Make Binder Twinne

Portage la Prairie, Man.—The Manitoba Cordage Co. of this city, manufacturers of medium and heavy wrapping twine, are now about to manufacture binder twine as well.

The concern only started last May to turn out twines and cordage from hemp grown in Western Canada and appears now to be well established.

PREPARING FOR BIG TORY MEET AT WINNIPEG

Second Distribution To Shareholders Of Saskatchewan Company

Hedging, Sask.—Aggregating almost \$1,500,000 the second distribution payment to the shareholders in Saskatchewan Co-operative Elevator Company, Limited, was made by the Saskatchewan General Trust Corporation, liquidators of the Co-operative Elevator Company. This is the second payment of approximately \$1,500,000 made since the Saskatchewan Co-operative Elevator Company, Limited, was purchased by the Saskatchewan Pool Elevators Limited, early in April. Twenty-eight thousand cheques were made out and sent to the shareholders of the company.

Showing there will be a full representation from the head of the lakes to the Pacific, General McRae stated that in British Columbia it was a question as to who could go as many were anxious to make the trip. He had received an assurance from Senator W. A. Griswold, of Northern Alberta would be fully represented, and he had the same information regarding Southern Alberta. Saskatchewan also was expected to send a full delegation.

There probably will be 1,500 delegates at least at the convention, stated the General, who declared it probably would mark an epoch in the history of the party. It would likely be looked back to as the greatest event since the days of Sir John A. Macdonald.

From Ontario there would be almost a complete representation of delegates, while the 200 expected from Quebec might be increased to 250. Enthusiastic reports were being received from the Maritime provinces and other districts, all pointing to a bumper convention.

Soviets Praised By Trotsky

Awaiting World Revolution Which Thinks Is Inevitable

Moscow.—Leon Trotsky, interviewed by an American labor economic delegation, praised the Soviet government as the first attempt to prove that a world Socialist society is workable.

He denied that the opposition in Soviet Russia, of which he is one of the leaders, wants the Soviets to declare war against the bourgeoisie countries, and said that the opposition sit with folded hands awaiting the world revolution which inevitably will follow the coming world war.

ANNUAL SHEEP AND SWINE SHOW

Victoria.—The annual sheep and swine show and sale will be held at the exhibition grounds here on November 1, 2 and 3. The show will be held in Saskatoon preceding its appearance here, on October 27 and 28. Some excellent prizes have been offered, including specials by breeders' associations.

Will Make Binder Twinne

Portage la Prairie, Man.—The Manitoba Cordage Co. of this city, manufacturers of medium and heavy wrapping twine, are now about to manufacture binder twine as well.

The concern only started last May to turn out twines and cordage from hemp grown in Western Canada and appears now to be well established.

Prince of Wales Shocks London

Bond Street is lamenting and Piccadilly refuses to be comforted and the voice of the mourner is heard in the land. Something resembling a fashion earthquake has struck London. So

ciety and the glasses of fashion and moulds of form of that city are in sackcloth and ashes. This, at any rate, is what Associated Press dispatches from that city tell us and the reason is that the Prince of Wales is wearing a hard straw hat. It appears that it "ain't done" in the best circles and what's more it hasn't been done for forty years. Only Harrow school boys, we are told, Smithfield meat porters and tourists commit this

CO-OPERATIVE ELEVATOR SECOND PAYMENT

Second Distribution To Shareholders Of Saskatchewan Company

Hedging, Sask.—Aggregating almost \$1,500,000 the second distribution payment to the shareholders in Saskatchewan Co-operative Elevator Company, Limited, was made by the Saskatchewan General Trust Corporation, liquidators of the Co-operative Elevator Company. This is the second payment of approximately \$1,500,000 made since the Saskatchewan Co-operative Elevator Company, Limited, was purchased by the Saskatchewan Pool Elevators Limited, early in April. Twenty-eight thousand cheques were made out and sent to the shareholders of the company.

Showing there will be a full representation from the head of the lakes to the Pacific, General McRae stated that in British Columbia it was a question as to who could go as many were anxious to make the trip. He had received an assurance from Senator W. A. Griswold, of Northern Alberta would be fully represented, and he had the same information regarding Southern Alberta. Saskatchewan also was expected to send a full delegation.

There probably will be 1,500 delegates at least at the convention, stated the General, who declared it probably would mark an epoch in the history of the party. It would likely be looked back to as the greatest event since the days of Sir John A. Macdonald.

From Ontario there would be almost a complete representation of delegates, while the 200 expected from Quebec might be increased to 250. Enthusiastic reports were being received from the Maritime provinces and other districts, all pointing to a bumper convention.

Will Conduct Soil Survey

Alberta Government To Investigate Agricultural Lands In North

Edmonton, Alta.—A soil survey of agricultural lands in the north country adjacent to the E. and B. G. Railway will be made for the Alberta Government in the next few weeks.

The work will begin as soon as possible after the return of Alfred A. Chard, who is in the north now checking up on the 200,000 acres of land that have been surveyed by the Government.

From Ontario there would be almost a complete representation of delegates, while the 200 expected from Quebec might be increased to 250. Enthusiastic reports were being received from the Maritime provinces and other districts, all pointing to a bumper convention.

STUDY BOUNDARY PROBLEMS

Representatives Of Canada and U.S. Meet In Vancouver

Vancouver—Problems of the international boundaries between Canada and the U.S. and Alaska are being studied by special commissioners from both governments. John D. Clark, director of surveys, Ottawa, and Col. E. Lester Jones, Washington, D.C., who are now in Vancouver.

Referring to the proposal as put forward by Hugh Denison, Australian trade commissioner in New York, that the port of Skagway in United States Alaskan territory should be internationalized or leased to British Columbian interests, Col. Jones said neither he nor Mr. Clark had heard anything of the scheme officially.

BALDWIN GIVES HIS IMPRESSIONS OF RECENT VISIT

Southampton, Eng.—Right Hon. Stanley Baldwin, Prime Minister of Great Britain, Mrs. Baldwin and party arrived on the Empress of Scotland after their extended tour of Canada.

"I have had a very strenuous time," the Premier said in an interview with a representative of the Canadian Press, "but it has been a wonderful experience and I have enjoyed every minute of it. In 19 days I made 26 speeches. I mention this only in case there has been an impression abroad that I have been on a holiday."

Mr. Baldwin has placed in writing his impressions of his tour upon his return to these shores as a bulky dispatch box was at Cherbourg awaiting his arrival there on his way to Southampton.

During the voyage the Premier treated his fellow passengers with characteristic courtesy but skillfully declined to be drawn into discussions on political or commercial matters into which some of the travelers hardly concealed their anxiety to be admitted.

Chatting with those around him, Premier Baldwin again alluded to the deep impression his journey across Canada had made upon him.

"Despite some thickly populated centres like Montreal, Toronto and Winnipeg, over 90 per cent. of the people are of British descent," he said, "so you understand why Canada's problem is different from ours. Even travelling standing against the Canadian Pacific Royal train at Winnipeg station, chattering to the Honorable Theodore J. Burrows, Lieutenant-Governor of Manitoba, and whatever they are saying it is odd on chance that they are not talking about straw hats, nor discussing the distress of Bond Street and Piccadilly. It looks as though the offending headgear was welcome extended to the Prince of Wales and Prince George."

The Premier especially mentioned the profound impression created upon himself and Mrs. Baldwin, when they first viewed the heights of Abram and afterwards witnessed the vociferous welcome extended to the Prince of Wales and Prince George. He also spoke enthusiastically of his visit to Lake Louise and of the simple heartiness of farewell given by Mrs. Baldwin and himself in Nova Scotia.

CUSTOMS INQUIRY TO BE RESUMED AT EARLY DATE

Ottawa.—Preparations are now under way for the re-opening of the sittings of the Royal Commission here.

The Ottawa sittings, which will open early in September, will conclude a period of investigation of approximately eight months by the commission into the customs department, the operations of the anti-smuggling treaty, transactions of breweries and distilleries in Canada and other matters coming within the scope of the Department of National Revenue.

The Ottawa sittings will be followed by preparation of a report for submission to the Government and to Parliament. That this report will contain important recommendations, possibly involving changes in departmental procedure, is to be expected. Improvement of the appraisal system of various ports in Canada, more rigid inspection of persons crossing the line between Canada and the United States at international bridges and ferries, possibly a decrease in the number of customs ports and outports in the Dominion, may be matters for recommendation. There are numerous other points which will be taken up.

ASK PRIORITY FOR PRESS TELEGRAMS

Delegates At Conference Believe They Should Be Accorded Preference

Geneva.—Press telegrams should be given priority over ordinary private telegrams says a resolution adopted by the International Press Conference. The delegates thus emphasized the idea that the news agencies and newspapers of the world, being the great medium for the presentation of daily world events, should be accorded preferential treatment.

Another resolution adopted declares that for the purpose of international communications a category of telegrams known as "urgent press" should be established at double rates, as compared with ordinary press telegrams and should have priority over ordinary private telegrams. The importance of this resolution would make urgent press telegrams cost the same as ordinary private telegrams.

WARSIPS IN COLLISION

Japanese Destroyers Struck By Cruiser Resulting In Heavy Loss Of Life

Tokio.—Four Japanese warships, cruising through the darkness with lights extinguished, were involved in two collisions which may have cost 129 lives, according to despatches from the Maizuru naval station.

In both cases, destroyers were struck by cruisers which were practicing night defences against destroyers. The first collision, between the destroyer Wazabi, which sank after 15 minutes with the loss of 103 members of the crew feared, the cruiser Maka, collided with the destroyer Ashi, 27 men being reported killed, although the Ashi was able to reach port in tow.

PREDICT LEATHER SHORTAGE

People Eating Less Meat and Hide Production Below Demand

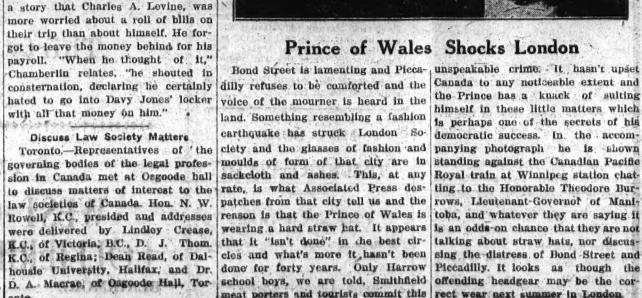

New York.—What the public saves at the butcher's, it must lose, at the shoe makers, according to a warning issued by the National Shoe Retailers Association. Too few cattle are being killed to provide supplies of shoe leather for the present season.

Because the public is eating less meat nowadays, present production of leather is far below demand and world's surpluses have been exhausted, the association declared. Advances of 15 to 20 per cent. in shoe prices were predicted.

SUGGEST CODING LAND TO U.S.

Williamstown, Mass.—Settlement of the French war debt by coding to the United States the three French colonies of Guadeloupe, Martinique, and French Guiana was suggested by G. Butler, Sherwell, economist of Columbia University, at the Institute of Politics.

WOULD RESTRICT IMMIGRATION
Philadelphia, Pa.—A plea for the restriction of high wages and restriction of immigration, and a denunciation of undesirable aliens in the United States featured an address given by James J. Davis, secretary of labor, speaking in the convention of the Loyal Order of Moose.

THE PEACE BRIDGE

The Prince of Wales opened yesterday the Peace Bridge between Canada and the United States—the bridge that commemorates the first hundred years of peace between the two countries. If a similar or an analogous landmark is added after each successive century of unbroken friendship, the 3,000 miles of frontier that runs between the Dominion and the Republic will hardly be long enough to contain them.

Canada and the United States have found the secret, or one of the secrets, of a sound international relationship. Their boundaries that march with one another across a whole continent are as innocent of hostile emplacements as two neighboring estates in England. No forts or ships or guns or soldiers guard them. Both nations have gone upon the principle that trust in one another is better than armed strength, and that acting as though they were always to be friends is a wiser and more civilized and infinitely more economical proceeding than assuming that one day they were bound to be enemies.

Yet both nations have highly distinctive individualities, lead separate lives, own different allegiances, are committed to and content with opposing forms of government. The peace between them, while immensely contributing to an identity of economic interests, has not changed their respective characters or emasculated in any way their divergent loyalties.

How long will it be before Europe, bristling with armaments and jealousies, learns the lesson that Canada and the United States have joined in teaching the world?—Extract from London Daily Express, August 8th, 1927.

VALUE OF SCHOOL

RATHER THAN JOBS

With the opening of school, hundreds of Boston boys and girls are deciding whether to continue school or go to work. Having reached the age of 14 and completed the sixth grade, the law says they may leave full-time day school and take a job. Many are tempted. Noting this, Grafton D. Cushing, attorney and president of the Massachusetts child labor committee, states as a means of helping the children and their parents to make the right decision, that investigation has shown that the child who stays in school eventually makes more money, finds a better job and enjoys himself better than the one who leaves school before completing the course.

"That each day spent in school adds \$9 to the total income earned through life, is the finding of the government study. According to the study made by Dean Lord, of Boston University Business College, a high school education adds \$33,000 to the total amount earned. The average untrained man according to his estimate, earns a maximum yearly income of \$1200 by the time he is 30, whereas the high school graduate reaches a maximum of \$2000 at the age of 40. The income of the untrained man becomes less a few years later, while that of the high school graduate remains surprisingly constant throughout his business career."

"The State may well ask: 'What's in it for me?' when the question of returning to school arises. These children are potential citizens. On their training and knowledge depends the future of Massachusetts."

"Ignorance is a civic menace. Yet out of 33,898 children of 14 and 15 years leaving school in a recent school year, 45 per cent had completed

ed only the sixth grade or less, and only 1.7 per cent, or one out of 50, had had more than an eighth-grade education.

"The Massachusetts child labor committee firmly believes that school is the right kind of place for every child until he is at least 16 years old, that schooling pays both the child and the State."—The Monitor.

BLAIRMORE TUXIS BOYS WIN JUNIOR BALL CHAMPIONSHIP

CALGARY, Aug. 30.—Blasted by nervousness and a barrage of clotting on the part of the visiting batsmen, and aided and abetted by a series of errors, the Calgary Riverside Y.M.C.A. went under to the Blairstown Tuxis team 10 to 3, in the final game for the Alberta junior baseball championship at Mewata park diamond on Monday evening.

After defaulting the first game of a three-game series in the afternoon, the locals were well on their way to victory in the evening performance to even up the series, when the club blew up in the last half of the eighth inning to let in eight runs.

Fox, who pitched for the home clan, weakened in the seventh, but he managed to get out of a tight pinch through fine support from his teammates. In the eighth, after two men were away with the bases clear, he was pitching arm weakened and he issued three free passes to first, forcing in victory in the evening performance to even up the series, when the club blew up in the last half of the eighth inning to let in eight runs.

Houbrugge, who did much duty for the coal town boys, deserved the victory, as he struck out 18 of the batters that faced him. He had one bad inning, however, the seventh, when an error and three hits in a row set three markers over the platter.

The twirler's performance on the mound was masterful, his rare menu of hooks and curves had the Calgary batters baffled, as they were only able to garner five bounces of his delivery. Up until the seventh frame Riverside had gone hitless, while the Blairstown aggregation had only secured three first base hits off Fox.

In Calgary's half of the seventh, Fox got a life when Phinney dropped his pop fly back of first. G. Miller singled to centre. Both runners came home when D. Luft cracked the pill into left field for a double. Rapp singled to right, scoring Luft, but the former was out trying to stretch his hit.

Blairstown came back in their half of the seventh and notched two runs. Houbrugge walked. Vangodsenenov hit to short and Houbrugge was retired at second. Hornquist and Evans received free transportation and the bases were loaded. Vangodsenenov and Hornquist scored when Pozzi singled to left.

The inning that spelled disaster to the locals was a scoring spree for the visitors. Kemp, the first man up, was safe when H. Luft muffed his hot grounder. Oakes hit into a double play, Austin to G. Miller. Phinney was safe when Austin made a mess of his hopper. Houbrugge and Vangodsenenov walked, filling the bags. D. Luft paved the way for two runs when he headed the pill over first in trying to catch Vangodsenenov off the bag. Phinney and Houbrugge coming home. Hornquist walked. Evans singled and Vangodsenenov and Hornquist came home. Austin made an error on Pozzi's grounder and the runners were safe. Both runners scored when Thompson lashed a hot liner into left field. Kemp, coming up for his second time in the frame, burned out a hot one to H. Luft, who foisted, and on the throw to the plate, Thompson was declared safe. When D. Luft hurled the ball into centre field in an endeavor to cut off Kemp, the latter laced the bags for the eighth and final counter of the game.

The box score: Riverside—A. B. R. H.P.O.A. E. H. Luft, 2b—4 0 0 2 4 2 H. Miller, r.f.—3 0 0 1 0 0 Austin, s.a.—4 0 1 3 3 5

CHAPTER VI.—Continued:

"You'll come over early, get dressed, and I'll make you up a little; just a little rouge on your cheeks, and your eyes darkened a little. You will go out in the car with my driver, and at the proper time he will bring you in, and I will introduce you. You will dance, with two or three, and then come to me and tell me you are tired. There will be a great fun—then over you, but you'll insist on going. Thomas will drive away with you, and then bring you back to the back door. Mrs. St. John will be there, of course, and she will see that the doors are shut. No one will see you, and you'll go to her room, strip off the clothes, put on your own, wash off the rouge and powder, and come down and help to serve. Won't it be fun?"

Heiml's days following this were passed in a golden glow of expectation. The whole air around her, the chaste, unimpeachable air of Miss Abbie's kitchen, trembled and glittered with visions. Her little world had suddenly changed by the touch of clinging silk and the steam of starry eyes—and then her own! Her young soul was intoxicated with the new wine of beauty and adventure.

At the next Ladies' Aid Meeting, Miss Abbie complained of Heiml's absent-mindedness. "I declare," she said, "that Heiml girl of mine is bewitched. She gave the milkman bread tickets this morning, let the toast burn, and I heard her talking to herself. I am so very tired I have been to withdraw," she said, and by the air of her you would think she was a queen upon her throne. I asked her if the girls were putting up a party or something, but she said no. But she is in great glee over something—hope she's not going to be taken down; she's a grand girl, only for this, and this has all come on so suddenly."

The day of the party came, Heiml

PAINS ALL OVER BODY

Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N.S.—"I had terrible feelings, headaches, back and side aches and pains all over my body. I would have to go to bed every night and sleep most of the day. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail, and my husband sent it to Father and me. We took it and we feel much better now. I am getting more from the store. I am feeling now and do all my work and am able to go out strong now. I tell my friends to take it. Lydia E. Pinkham's Vegetable Compound does what made me feel so well."—Mrs. VICTOR RICHARDSON, Barrington, Nova Scotia.

Dull Pains in Back

St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back, and the weakness from which I suffered for five years after my boy was born. At first I took a few tablets and then using Lydia E. Pinkham's Sanative Wash I am feeling better than I have for the past seven years. I have had to give up my work, but I am getting along well."—Mrs. F. JOHNSON, 44 Moore Street, St. Thomas, Ont.

now. She was going to be such a lovely lady no one could keep her out longer than they could keep out Mrs. St. John. And besides, she would be so good to poor girls, everyone would be.

She would bring out Flin girls—a ship load of them—and make lessons for them on the boat, and show them how to make dresses and do their hair, make stylish coats and say stylish English words. She would drive her own car, going to see her Flin girls, and would teach them nice girls like Canadian girls make, and have nice suppers and give them copies of the Blue and Gold Book.

Lost in the pleasant dream, Heiml did not notice that a cloud had come over the sun and a chill had fallen. A drab little wind with an ugly jagged edge on it, came twisting across the road blowing dust in her eyes. She looked up. Aunty's flower garden had faded, and what a vision splendour it was!

A sudden chill fell on Heiml's heart. Like most of her countrymen she was sentimental, and she shivered, dressed now in a coat of dead Silvering she went into the house.

Sitting no one around, Heiml ran upstairs. Her friend was sick, may be. That was the trouble we were coming.

In a darkened room, smelling heavily of some strange odor, Heiml found her lovely lady lying with face white and drawn, her eyes burning like Aunt Lill's had been. Heiml's heart was sick with fear. Was she to lose the flower garden again?

"Oh, Mrs. St. John, what is it?" Heiml's English grew panicky.

"It will be all right, Heiml," her friend's ready voice reassured her. "You can help me. Will you go down town for me?"

"Yes, I go—anywhere," whispered Heiml, frightened by her friend's ghastly pallor; "I get doctor—he will get medicine."

Mrs. St. John's hand flew up in an imperative gesture. "You'll do as you're told, Heiml! I do not want the doctor."

The angry tone brought tears to Heiml's eyes.

Mrs. St. John's voice softened. "Don't mind me, Heiml, I'm sick. The doctor wouldn't understand; and he would be cross."

Heiml grew more mystified.

"Listen, dear, you are my best little friend, I can trust you. Never tell Heiml, I have a bad heart, and only one medicine can make me well." She paused a minute, and Heiml could feel her burning eyes on her face in plain entreaty.

"Can I get?" asked Heiml.

"Yes, dear, you can. Go down town—here's the address, ask for Sam Heiml, a doctor, a Chinese doctor, that's why we mustn't tell; Dr. St. John would be angry. Doctors often hate each other. Dr. Heiml will give you the medicine, but you mustn't tell him I sent you. Don't say my name, Heiml. And never tell—oh, Heiml, I will love you if you'll never tell. I have taken my box—who else—think he knows—the doctor—for he is always sends it with the laundryman, but today the doctor was here. I am so afraid, Heiml. Did you take my box, Heiml?"

Heiml's eyes were wide with terror.

"No, no, I'm crazy with pain, Go, Go, Heiml; and be quick and never tell. Heiml promise me; if you tell I will die."

(To Be Continued.)

Ivory Making Eskimos Rich

Long Buried Tools Found On Islands In Behring Sea

An Ivory harvest arrived at Tacoma recently on the schooner Boxer, which represented an unintentional bequest from long dead Eskimos to the present generation. As ages nations of the islands in Behring Sea took walruses, the oil and blubber and threw the gleaming white tusks on the dump or kitchen midden, back of their igloos.

The piles accumulated during the centuries until the white man came with his trading schooners and eagerly bought the tusks of freshly killed walruses. Those Eskimos of to-day, descendants of the primitive habits of their ancestors, promptly began to sink mines on the sites of ancient camps and villages. Each year for four years on St. Lawrence Island alone they have dug out thousands of dollars worth of fossil ivory.

The up-to-date and semi-educated Eskimos do not waste time going far to spear their meat, they simply mine the buried treasure, sell it and buy the white man's food with the profits.

He who lends money to a friend is apt to lose a thief, a friend and money, too.

During the International Fair at Budapest there were 30,000 visitors from other countries.

Diplomats Think Of War

At the Same Time the Public Is Assured That War Is Unthinkable

While statesmen on both sides of the Atlantic have been assuring the world that war between Britain and the United States is "unthinkable," the naval experts at Gevaya have been acting as if that was what they were thinking of most of all. Banish the thought of a war and the greater part of the arguments on which the experts lay so much store vanish.

It war is unthinkable, it should make no difference to the British if we use our quota of cruiser tonnage built larger than smaller ships. It was unthinkable that a war is unthinkable, that these crusaders could ever invade Great Britain.

It war is unthinkable, it makes a great difference to Great Britain if the smaller ships carry eight-inch guns rather than six. They would not be used against Britain anywhere.

It war is unthinkable, it would afford to consider the British proposal to reduce the size of capital ships. It war is unthinkable, "parity" is something to get too much excited about, for in respect to all other powers we should in any case have superiority.

The truth of the matter is that the admirals both sides are manoeuvring for advantage in a war which exists on paper. We need not suppose that they desire a war or expect actually to take place. But they insist, nevertheless, on assuming a war as the major point of their thinking.

They do not take seriously in fact they take stock in the rhetoric of the statesmen, and they would undoubtedly feel they were doing less than their duty if they did not count for every conceivable advantage.

Preserve Indian Relics

British Columbia Brings New Regulations Into Operation

Indian relics in various parts of British Columbia have been brought under the protection of the law by order-in-council passed by the Provincial Government following investigations by Hon. William Sloan, provincial secretary.

The new regulations bring into actual operation for the first time the strict provisions of the Historic Objects Preservation Act, under which it is illegal to deface or remove historical objects, officially designated.

Hungarians Make Good Settlers

More than 20,000 Hungarians have settled in Saskatchewan, according to Albert de Haydin, consul-general for Hungary, concluding a trip of inspection in the west. More than 7,000 Hungarians have been distributed throughout Canada this year and more are coming, he stated. He declared that they make ideal agriculturists.

The piles accumulated during the centuries until the white man came with his trading schooners and eagerly bought the tusks of freshly killed walruses. Those Eskimos of to-day, descendants of the primitive habits of their ancestors, promptly began to sink mines on the sites of ancient camps and villages. Each year for four years on St. Lawrence Island alone they have dug out thousands of dollars worth of fossil ivory.

The up-to-date and semi-educated Eskimos do not waste time going far to spear their meat, they simply mine the buried treasure, sell it and buy the white man's food with the profits.

What Makes a Town?

A prosperous rural population which demands a community centre where may be established business, educational, religious and entertainment facilities. Where these flourish and are active it is safe to surmise that the people of that section realize and appreciate the value to them of such a centre.

What Maintains It?

The towns are largely maintained by the surrounding districts. But the organization, the direction, and to a great measure the up-keep, of the institutions in such towns are in the hands of the business interests, together with those directly and indirectly connected therewith. Without the active business and professional men to supervise and govern these public institutions and undertakings, no town could thrive.

Who is Mainly Affected?

Every citizen either in or about a town should be concerned in seeing to it that they do their part in carrying on any good cause which may be promoted, either by financial or active support. Only in this way will any town prosper and develop as it should.

Publicity is Required?

In promotion work your local paper takes the leading part. It is ever the champion of worthy causes and philanthropic and patriotic undertakings. But to function properly, and fully carry out its natural prerogatives, it must in turn have the financial support of the community it serves. When needing advertising or printed matter always first think of

313 Manning Chambers, Toronto

A rather deaf old lady found herself sitting beside a physician at dinner. She asked: "Should I call you Dr. T. — or Mr. T. —?" "Call me what you like, madam," he replied, and added genially, "some of my friends call me an old fool." "Ah," she rejoined, not hearing correctly what he said, but anxious to be pleasant, "those are the people who know you intimately!"

ONE OF THE THINGS THAT WOULDNT HAPPEN IN BLAIRMORE

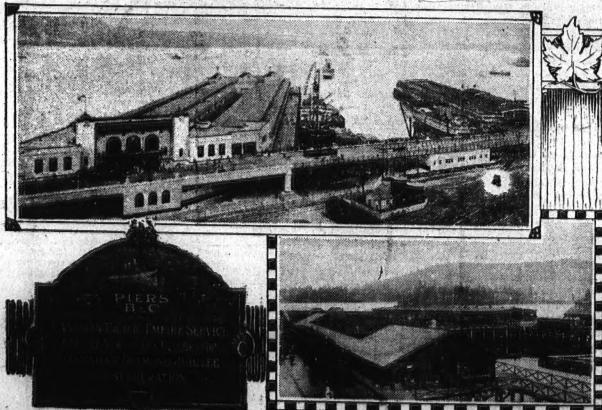

(The Lethbridge Herald)

Frank Oswald, of Coleman, and Pete Klem, of Edmonton, charged with stealing a ride on a C.P.R. freight, came up before Magistrate Hamilton today and were allowed their freedom on condition that they would get a job.

A GOOD PROPOSITION

The Claresholm council has authorized the sale of the old skating rink site, consisting of two and one half lots, to Mr. Dick, of Calgary, for the sum of \$1,000, a steam laundry to be erected on this land, of brick or concrete, the title to remain in the name of the town until the building is erected, or a satisfactory guarantee given to assure its erection.

Great Pier Dedicated to Empire Service

1. New C.P.R. Pier Vancouver

2. Bronze plaque unveiled by Mayor Taylor of Vancouver.

One notable feature of Greater Vancouver's celebration of the Diamond Jubilee of Confederation and one that no other city in the Dominion can boast of in creating—was the dedication and official opening of the new \$6,000,000 Canadian Pacific Pier B.C.

The new mammoth pier is the second largest pier in Canada and was planned with an eye to a progressive future when Vancouver will be one of the biggest port on the Pacific coast. It is designed to accommodate at least two of the greatest liners built.

It is a far cry from the first wooden pier docks built by the Canadian Pacific in 1887 when Vancouver was a city of stumps and possibilities to the present pier with nearly 3,000 feet of space available and accommodation for the storage of a dozen of even the most modern ocean gray-

ounds. Representing the last word in modern marine construction, the new pier is also unique for a pleasing manner in which the practicality has been combined with the beauty of design.

The Canadian Pacific is interested chiefly in the trade with Australia and New Zealand. Although imports and exports are of a similar nature, the most valuable single article is still silk which must be transferred from boat to rail with the least possible delay. Facilities for the rapid and careful handling of all cargoes.

While designed primarily for the Canadian Pacific, Pier B.C. will allow Pier E-C to be used by ships of other lines. Its length of 1,140 feet permits the docking on either side, of the largest of the present day trans-Pacific boats—the Empress of Canada, 840 feet in length—with a

Here and There

Air mail service between Winnipeg and Fargo, North Dakota, has been inaugurated and the first mail for Winnipeg from the United States arrived recently.

The potato acreage along the Don River, Alberta, is larger than last year and a 40 per cent crop increase is looked for. There will likely be 175,000 barrels available for export, as compared with 132,000 last year.

British Columbia's farms produced \$71,362,200 last year, breaking all records and gaining \$6,200,000 over the previous year, according to the final figures of the Provincial Statistician, G. H. Stewart. Lumbering leads with agriculture second.

A new world record is set—900 white Leghorn baby chicks arrived from the University of British Columbia at the University of British Columbia, safe, sound, and hungry, all of them. None had feed or water on their 3,000 mile journey and none died or suffered.

A Barred Plymouth Rock, owned by Mr. and Mrs. J. G. Foster, has established a new record for the three Prairie Provinces, laying her 300th egg in her pullet year of which there is still one month to go. The world record for pullet production is held by No. 6, an Agassiz, B.C. pullet, which laid 363 eggs in 364 days.

Members of the newly-appointed Saint John Board of Harbor Commissioners, headed by Hon. W. E. Foster, recently concluded conference with Canadian Pacific officials of Montreal in connection with the proposed improvements in the grain handling facilities of the port. The chief object of the commission, according to Mr. Foster, is the creation of a national idea of an All-Canadian trade route through the Port of Saint John.

Scots in Canada are looking forward with keen interest to the coming Highland Games and Festival of Scottish music to be held at Banff September 3 to 5, the activities taking place on the grounds adjoining the Banff Springs Hotel. The games are being organized by the Canadian Pacific Railway officials this festival has been made possible and is also the line of the Canadian Pacific Song Festival held at the Chateau Frontenac, Quebec, in May which was voted such an outstanding success.

The United States' interest in the development of the locomotive in Canada is seen in a request by the Baltimore and Ohio Railroad to send one of its latest passenger types of engines to the centenary exhibit of locomotives which will open at the Exposition on September 24th. The Canadian Pacific has arranged to supply one of its latest types of the "2300" class locomotives, complete with tender. This is the company's fastest and most powerful passenger locomotive.

One of the strangest attempts at taking a census is now being made by Andrew Wilsden of Bella Coola, B.C., according to information received. At the request of Mr. Wilsden of the National Museum of Canada, Mr. Wilsden is taking a census of the grizzly bear population in some of the very isolated fjords which are included in the "Norway of America" traversed on the steamship journey between Prince Rupert and Vancouver. The coast line between the two ports is a noted big game hunting spot and attracts many grizzly hunters each year from all sections of the continent as well as from other parts of the world.

The entire grocery stock of Revillon Wholesale Company, Edmonton, has been purchased by Campbell, Wilson & Horne, Limited; McDonald's Consolidated, Limited, and Western Grocers, Limited.

Highland Gathering in the Canadian Rockies

1. Regimental Piper **2. Scots in Canada—painting of Sir George Simpson on ceremonial inspection of Hudson Bay Co's posts in**

On the first of the events concerning the Right Hon. Stanley Baldwin touches on after his arrival in Canada was certainly the Canadian Folksong and Chateau Frontenac last May. Premier Baldwin observed that such a Festa was in order, and upholding the tradition of hospitality, the prime minister and his wife made a visit to the chateau.

ing and reviving the old-time customs, songs and dances, indigenous to Canada life and particularly the province of this musical audience come the "Twa Sisters of Binche" singing at the Banff Festival is about to take place at Banff, September 3 to 8. Scottish folk-singers are coming along with keen interest to the coming festival which the Prince

Soots in Canada played a memorable part in the development of the country, their names having prominence in many historic engineering, industrial and exploring enterprises—such men as Fraser, MacKenzie, Thompson, and many others in the past generations who have penetrated the unknown land.

Here there is same mountainous terrain as in Scotland, and the world renowned for beauty, the Scottish Gathering and Festival will be held. Activities will centre around the Banff Springs Hotel that stands on the side of Sulphur mountain, where Ruth Matheson, wife of the first success on the concert stage, will sing.

Ruth is the daughter of Ruth Thom and hauls originally from North-east Scotland. Davidson, Thomas, first sang the "Piping of Peter Pan" and directs the famous Grace Church Choir in Winnipeg, triumphant shield-winner in the Canadian Western Festival. He has had a hand in the Canadian Music Festival in the United States as well as Canada. Ruth Matheson is a young contralto of Winnipeg who has won wide recognition for her interpretation of Scottish songs. She comes of the stock of the Kildonan settlers. Norman Cameron is a

Trees In Western Canada

In the great nation-building work of settling the vast plains of Western Canada one objection to overcome with many intending settlers, especially from Ontario and other countries where woods and forests prevailed, was the lack of trees. To those accustomed to living in a tree country, the bare prairies with their unbroken stretches as far and as far as the eye could reach, presented a barren, uninviting appearance. There was not only a lack of that restfulness and beauty which trees provide, but an absence of protection from the elements when high winds prevailed, the snows drifted, and blizzards occasionally blew.

During the earlier days in the settlement of the West, many home-seekers travelled long distances from the area traversed by the railway to find locations in districts where there were trees because, what they wanted was a mere place where they could "hang" the soil for a time, make some ready money quickly and then get out, but a home and permanent home for their children where they would have a better opportunity in life than in the lands from which they had come. They put up with inconveniences inseparable from their isolated locations solely because they preferred the wooded districts to the open, seemingly unattractive prairies.

In those early days, however, thousands of people came and took up homesteads who had no intention of establishing permanent homes. They were speculators, more or less indifferent to their surroundings, concerned only with the making of money as rapidly as possible. They were quite frank in admitting they had no thought of making the West their home for the remainder of their lives, but that, on the contrary, they were using it as a half-way house, a stepping stone to some other and better place. "Many came with the idea of making money which they could not accumulate in their old Eastern homes and then returning there to live and ultimately die."

Some years ago the fact was borne into the minds of the Federal Government that the problem of the people of the West was not so much one of immigration as of colonization; not so much the obtaining of settlers as the retaining of them once they had come. In a word, the real problem was how to get people to regard the West as a place of permanent residence, how to get people to establish homes rather than mere dwelling places.

It came to be realized that a farm house, stables and barns set down in the midst of a flat prairie, utterly lacking in anything approaching beauty of location and surroundings, could never appear as a "home," and could never inspire in the minds and hearts of children that affection which the parents still retained for the old homes they had left. And it was realized that what was needed to convert these prairie dwelling places into real and permanent homes was "trees."

There was an impression abroad, however, that trees would not grow; if they would, why was not the prairie country covered with them as was the case in other lands of vast virgin areas. But this was not a convincing answer, and it was argued that if trees would grow elsewhere, they would grow on the rich, fertile plains of the West. And, always, some enterprising settlers soon proved that this was so.

The problem of getting trees, getting them in large numbers and cheaply, because these early settlers had little money to spend, and just the right way to plant and cultivate them, still existed. Then the Dominion Government inaugurated one of the finest of its many splendid services for agriculture when it established forestry farms in the West.

These farms have worked a veritable revolution in the appearance of the Western country. Estates which were on the bare prairie, a few years ago, are now carpeted into miniature forests, and there have gone forth millions of trees, distributed free of charge to farmers all over the West. Experts have advised on tree culture, farmsteads have been inspected, advice on planting given. Today, hundreds and thousands of Western farm dwellings have been transformed into homes of real attractiveness and beauty to which their owners and their children have become permanently attached and for which a real love is now manifested. Trees have proven a great and effective agent of colonization, while at the same time providing shelter for stock, protection for gardens, and a comfort to all when strong winter winds sweep across the land.

Prairie cities, towns and villages have caught the spirit and learned the lesson (taught by these forestry farms, and formerly wholly unattractive places, as, for example, the capital city of Saskatchewan, where nature failed to endow with any of her assets, have become places of real beauty, which are a source of pride and delight to their residents, and of surprise and pleasure to visitors from afar.

The Federal Government is deserving of all praise for its forestry farms and tree planting policy, and to an ever increasing extent it is to be hoped the people of Western Canada will second the efforts of the Government and even more energetically prosecute the work of surrounding their homes with trees.

Flowers Made Of Rubber

Reproductions Are Very Realistic and Will Not Crush

Realistic reproductions of several different kinds of flowers are now being made from rubber by a patented process. They are copied in natural sizes, a drop of perfume may be added to heighten the effect of general beauty, and an additional feature is that the leaves and petals cannot be crushed or bent, one of the objections to cloth flowers. The rubber flowers may be quickly washed with soap and water and are so arranged that they may be opened or closed to represent fully blown blossoms or buds.

Wedded To a Tree

Blind Girl In India Is Tragic Figure

A blind girl of twelve gropes her way with extended hand at dusk each night to a sacred tree at Bardoli, India, and puts her arms around it, crying softly over the tragedy of her life. The tree is her husband under Hindu law and she can never have another. When she was six years old the child had smallpox. Her face was disfigured and she was blinded. Her father, deciding no man would ever want to marry her, and not desiring to suffer the stigma of having an unmarried daughter, had her married with full Hindu rites. The tree to which she was a former wedding feast to celebrate the event.

Winnipeg Prize

The Shorthorn bull, King of the Fairies, recently sold from the Canadian ranch of H. R. H. the Prince of Wales to a United States breeder, again won the premier prize at the Calgary Exhibition. The "King's" son, Prince of the Fairies, however, lost out and had to sell his crest to Colyne White Ensign, belonging to T. A. Russell, of Toronto.

In a recent month nearly 60,000 pairs of leather slippers were sent from this to other countries.

New Use For Alarm Clocks

Warn Topeka Business Men Of Time Limit For Parking

The alarm clock, faithful servant of the American home, now is employed as a warning that the business man's automobile has been parked long enough and that it's time to move on.

With a two-hour parking limit in the business section of Topeka, Kansas, business houses have installed alarm clocks in their offices. At the end of two hours the alarm rings. A man gets up, hurries out and moves all the automobiles belonging to employees. The alarm is set ahead two hours and the performance repeated. So it goes through the day.

Paint a Corn With This Marvel Liquid

The paint stops in a few seconds. Tight shoes won't hurt anymore. The liquid is applied to the corn and doesn't pain a bit. It's the sure remedy—Putnam's Corn Extractor. All druggists sell both tonic and Corn Extractor. Get your bottle today. Refuse a substitute for Putnam's.

Make Presentation

Seed Growers' Association Honors L. H. Newman At Ottawa

On the occasion of the recent conference of branch farm superintendents, at the central experimental farm, Ottawa, one of the most pleasant events was a presentation to L. H. Newman by his former employers, the Canadian Seed Growers' Association.

E. S. Archibald, director of technical experimental farms, presented to him the Hon. W. R. Motherwell, on behalf of the Canadian Seed Growers' Association, made the presentation, consisting of a suitably engraved gold chain and pendant, with a most appropriately illuminated address.

WEAK AND NERVOUS

The Condition Of A P. E. I. Lady Who Again Rejoices In Good Health

"I can most heartily recommend Dr. Williams' Pink Pills to all weak people," says Mrs. Augustin Arneau, Wellington Station, P.E.I. "Before I began their use, I was very weak and tired, but I have always worked hard, with no thought of my health; until suddenly my strength left me. I began to feel tired and nervous, feeling just as tired in the morning as when I went to bed at night. I began to feel discouraged with my work, but I got some medicine from the doctor whom I consulted, but did it not appear to help me, as I showed no improvement. I then asked him if he had any neighbor advised me to try Dr. Williams' Pink Pills and I got a supply of this medicine. I very soon found that it helped me, and I continued taking it until I was well again, and I have been strong and well ever since."

Dr. Williams' Pink Pills do what they say—and do it well. They build up purity and enrich the blood, and as the blood supplies the whole body, new life is given to the entire system, which is good for all weak people. They are easily absorbed, and the cure can be yours by taking Dr. Williams' Pink Pills. Begin today. Sold by all medicine dealers or by mail post, at 50 cents a box from Thos. Dr. Williams' Medicine Co., Brockville, Ont.

Leaves Valuable Estate

An estate provisionally valued at \$1,046,413 gross, was left by the fifth Marquis of Lansdowne, former governor-general of Canada, who died at Clonmel, Ireland, in June. It was shown by his will recently. The widow and the present marquis are the beneficiaries.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Growing Tobacco In B.C.

Experimental crops of tobacco are being grown on 65 acres of land at Oliver, B.C. Fifty acres have already been planted to the satisfaction of Mr. McVette, of the B.C. Tobacco Products. Good progress has been made and the prospect is promising.

More buildings were started in Canada in the first four months of this year, than in the same period of the past seven years.

Campers.

A reliable first-aid remedy in the woods for burns, bruises, cuts and wounds.

Speed Hard To Imagine

Expect English Racing Planes With Travel 30 Miles An Hour

Some weeks ago an English army officer, during a test run on a Florida beach, drove his car at a speed of 207 miles an hour. This is the greatest rate of travel ever made in any sort of machine driven on land or sea. But it is reported that an airplane has been made in England for a forthcoming race which can develop a speed of 300 miles an hour.

It is not easy to realize what it would mean to travel at such a rate of speed. The fastest express trains rarely go faster than sixty or seventy miles an hour. Three hundred miles an hour is a speed greater than the average velocity developed by a human being falling from a great height. The French alman Jean van Laere, flying over Beaumont-sur-Oise, got into difficulties at an altitude of more than four miles, and jumped with his parachute from the machine. The parachute did not open until he was only 300 feet from the ground, but in time to save his life. From the moment he jumped until the moment the parachute opened he fell four miles in about seventy seconds. That is at the average rate of 206 miles an hour. And the mystery plane will, it is said, be capable of a speed 50 per cent greater than that!

The Many-Purpose Oil. — Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cutting, burning, sealing, greasing, lubricating, as a medicine, for the administration of oil enemata, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing properties of this fine oil emulsion which has made thousands of firm friends during the past fifty years.

Will Protect For Industry

Tax On Peits Taken In Northwest Territories Effective January 1, 1929

The act imposing a tax on furs taken in the Northwest Territories, passed at the last session of Parliament, will come into operation on Jan. 1, 1929, according to an announcement by the Hon. Charles Stewart, Minister of the interior.

The tax in these territories was imposed by the Dominion in order to place them on the same basis as the various provinces, which with the exception of Prince Edward Island, impose a tax on furs to aid provincial revenues. The tax will be on the same basis per pelt as in the prairie provinces and British Columbia, and will tend to prevent smuggling of furs from these provinces into the Territories for sale.

It is expected also that conservation of fur-bearers will be promoted by the new law in several ways. Permits will be required to ship out furs and in order to prevent the smuggling of valuable small pelts in shipments of non-taxable furs such as wolf skins, all pelts will be examined and stamped.

This is believed will check the pernicious practice of taking unripe furs, that is, furs of animals killed when they are in a tender condition. Furthermore, this examination will show the actual take of furs both by species and by districts, and provide data which will be of value from a conservation standpoint.

Sweet and palatable. Mother Graves' Worm Exterminator is acceptable to children and it does its work surely and promptly.

Waterpower Resources

The official information available at a central source regarding the water-power resources of Canada, as to capacity, and availability is most complete. The Index Inventory System of investigating and recording water-power resources, originated by the Dominion Water Power Branch of the Department of the Interior and developed and carried out in full collaboration with the provincial governments, has resulted in all possible information on this subject respecting any river or district being available at the head office in Ottawa for any interests concerned.

Minard's Liniment for cuts and bruises.

A Queer Society

One of the queer societies of Oxford University is the "Updale Down Graves." Three times a year its members go through a day doing everything backwards. Donning evening dress in the morning, they start with elegant port and a prelude to a reversed dinner, ending with hors d'oeuvres. So on through the day, until they eat breakfast and retire.

To Visit U.S.

Former Premier David Lloyd George has promised that he will visit the United States in 1928 to meet American workmen and presidents at the international Elstreefest, says a despatch to The Westminster Gazette from Llandudno, Wales.

WHEN USING
WILSON'S
FLY PADS

READ DIRECTIONS
CAREFULLY AND
FOLLOW THEM
EXACTLY

There is only one way to kill all the flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the windowsills. Turn the light on strong, let in the light and leave it for two or three hours, then sweep up the flies and burn them. See illustration below.

Put the plates away out of the reach of children until re-qualified in another room.

The right way to use Wilson's Fly Pads

Historic Memorials

Massive Fortress Of Fort Lennox On the Richelieu River

Among the historic memorials of Canada that have been from time to time placed under the care of the Canadian National Parks Branch of the Department of the Interior there is none richer in historic interest or more charmingly situated than the massive old fortress, Fort Lennox, that stands in quiet dignity on the southern end of Isle aux Noix in the Richelieu river, in the province of Quebec. This fortress was erected by the British military authorities in the early part of the nineteenth century and since its abandonment as a military post in 1869 has been visited by increasing numbers of tourists each year.

The tax in these territories was imposed by the Dominion in order to place them on the same basis as the various provinces, which with the exception of Prince Edward Island, impose a tax on furs to aid provincial revenues. The tax will be on the same basis per pelt as in the prairie provinces and British Columbia, and will tend to prevent smuggling of furs from these provinces into the Territories for sale.

It is expected also that conservation of fur-bearers will be promoted by the new law in several ways. Permits will be required to ship out furs and in order to prevent the smuggling of valuable small pelts in shipments of non-taxable furs such as wolf skins, all pelts will be examined and stamped.

This is believed will check the pernicious practice of taking unripe furs, that is, furs of animals killed when they are in a tender condition. Furthermore, this examination will show the actual take of furs both by species and by districts, and provide data which will be of value from a conservation standpoint.

Sweet and palatable. Mother Graves' Worm Exterminator is acceptable to children and it does its work surely and promptly.

Ering husbands in Central Africa are fed a lizard porridge by their wives, who have a firm belief that the hunting instinct of the lizard will be transmitted to their men.

Fair Dates For 1928

Western Association Of Exhibitions Hold Meeting in Regina

At a meeting of the executive of the Western Canada Association of Exhibitions, held in Regina, recently, dates for the coming year were arranged as follows:

Brandon, July 2 to 6; Calgary, July 9 to 14; Edmonton, July 16 to 21; Saskatoon, July 23 to 28; and Regina, July 30 to Aug. 4.

A meeting of the executive will be held in Toronto to interview Hon. W. R. Motherwell in regard to grants and other matters of common interest.

The various fair associations were represented by the following men: From Regina, H. G. Smith, J. R. Martin, D. T. Elderkin and J. F. Thompson; from Saskatchewan, Robert Wilson and Archie White; from Manitoba, William Dowling, Archie McPhail, J. E. Bettie and J. A. Chapman; from Calgary, N. S. Christie, E. D. Adams and E. L. Richardson; from Edmonton, W. J. Stark was the only representative. President Nat Christie presided.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother Fletcher's "Castoria" has been in use for over 30 years to relieve babies from colic, flatulence, Wind, Colic and Diarrhoea; allaying Fevershines arising therefrom, and by regulating the Stomach Bowels, aids the assimilation of Food, giving natural sleep without opiates.

The genuine bears signature of

Castoria.

Saskatchewan Glauber Salts The Whiteside Salts & Chemical Company, operating at Palo, Sask., took out 3000 pounds of glauber salts daily last winter, the greater part of which was shipped to Winnipeg and Eastern Canada. The company is endeavoring to find a practical process for the hydration of the salt.

Proved safe by millions and prescribed by physicians for

Colds Headache Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Drugs.

Aspirin is the trade mark registered in Canada of the Bayer Manufacture of Monaco, Germany. Aspirin is a registered trademark of the Bayer Company. Any仿製品 will be stamped with their general trade mark, the "Bayer Cross."

THE PASS FIFTEEN YEARS AGO

(The Blairstmore Enterprise, 1912)
July 25.—John Riglen was found guilty of wounding Simone Van Burgen with a bullet on the night of June 26th, and was sentenced to serve six months in jail with hard labor and to pay a fine of \$25.

Jack, the little son of Mr. and Mrs. J. A. McDonald, of the Union Hotel, Frack, met death on Friday last, by falling into a tub of hot water.

Born, on Sunday night; July 21st, to Mr. and Mrs. Fred Gilroy, a daughter.

Mr. and Mrs. T. Ede have returned from an extended trip through the middle western States.

Miss Cogland, late of the Blairstmore teaching staff, has accepted a position on the staff of the Fernie school.

Lethbridge Wesley church Sunday school picnic will be held at Crow's Nest today.

The heavy rains of the past month are causing some anxiety to farmers in the foothills.

The officers for the ensuing term of Blairstmore Lodge, I.O.O.F., were installed on Tuesday night, as follows: J. McPhail, J.P.N.G.; W. J. Bartlett, N.G.; R. C. Green, V.G.; Clarence Lewis, R.S.; F. E. H'nds, F.S.; H. G. Bigelow, warden; Dr. A. H. Baker, conductor. The officers were installed by District Deputy F. W. Doubt.

The Blairstmore Brewery Company are claiming that their product is being damaged by dust from the cement plant.

August 1.—A joint meeting of the Blairstmore and Coleman boards of trade was held on Wednesday night to hear proposals being put forward by the Lethbridge board of trade through Mr. James G. McEwan, their representative, urging that a branch of the lands titles office be established in The Pass.

Rennie Graham, Annie McLeod and Christina McLeod, the only students of the local school writing examinations, passed successfully.

Abe Sparks, proprietor of the Cosmopolitan hotel, has decided to build concrete sidewalks along the front and west side of his hotel.

On Monday last, Abe Sparks was nominated to succeed Mr. J. G. Smith as a councillor and is declared elected by acclamation.

Sam Wilkins paid the death penalty at Macleod on Friday morning for the murder of George Lakatoc at Frank.

August 8—William Simister was drowned in the Old Man river near Lundbreck on Friday last.

A portion of land has been purchased from Capt. W. A. Beebe, on which it is proposed to erect a closed-in rink.

Major Allison was found dead in his room at the rear of the Coleman drug store on Sunday morning last, death being due to heart failure.

Gilbert Roy and family, who have resided in Blairstmore for some years, left on Wednesday for Westville, Nova Scotia.

Fraser & Sinclair sold the lot adjoining and east of the Cosmopolitan hotel for \$4000 cash.

Richard Wilcox, eldest son of Mr. and Mrs. J. E. Wilcox, was drowned at Frank on Wednesday afternoon, while swimming with a number of boy chums.

The stork visited the home of Mr. and Mrs. James Cousins at Bellevue on Friday, leaving them a baby daughter.

Ralph Maddison, of Portland, Oregon, is visiting his brother Bill at Bellevue.

Eugene Schnurr has said good-bye to his friends at Frank and has moved to Calgary.

Marshall Hamilton and family have returned from a week in camp at Race Horse Creek.

SUGGESTS DOCTORS
DO CASH BUSINESS

"There are \$5,000,000 worth of unpaid bills on the books of the doctors of this province, and the bankers generally do not favor advancing loans on the strength of doctors' accounts," W. G. Hunt, secretary of the Alberta Medical Association, said in an interview following his return from an extended visit to Alberta medical men throughout the province, Tuesday morning.

"It has been found that, in many cases, patients being dunned for the payment of their accounts, become knockers to intend patients, and thus they retard the progress of these patients by weakening their confidence in the doctor."

"If doctors were to go on a spot cash basis there would be 500,000 fewer sick days recorded each year in the population of Alberta, and if the doctors' accounts were paid promptly, scores of medical men who have been unable for financial reasons to go to the medical centres for post-graduate courses, would be able to do so, and this province would benefit."

"Some doctors have suggested that the College of Physicians and Surgeons take the matter up with vigor," Mr. Hunt continued. "The doctor is the only man in the community who holds himself in readiness for 24-hour service, and there is an erroneous impression abroad among the laity that he is not permitted by law to refuse. A doctor is not compelled by law to answer calls, and yet calls are made at all hours of the day and night under all conditions. Many times no provision is made to pay the actual expenses incurred in the trip."

"What the Council of the College of Physicians and Surgeons may do in regard to this matter cannot be considered officially,"—Albertan.

FINANCIAL STATEMENT
B.E.S.L. SPORTS

The members of the Blairstmore Branch of the Canadian Legion B.E.S.L. wish to thank all those who so freely assisted them in the financing and conducting of the sports held here on July 1st and 2nd.

A list of contributors follows, along with a statement of all receipts and disbursements connected with the sports.

Receipts—Contributions \$399.50, sale of concession \$15.00, sale of tags \$60.25; total \$1064.75.

Disbursements—Bandmen \$216.00; commission on sale of tags \$45.50, printing, etc., \$51.48, taxi service \$19.00, baseballs, football, etc., \$25.25, prizes, medals, etc. \$474.00, registration of sports \$10.00, miscellaneous \$39.70; total \$878.92. Credit balance \$185.52.

The Legion desires to thank the following donors: McLaren Lumber Co. \$25.00, A. Greig \$5.00, Tea, Kettle Inn \$2.00, L. L. Morgan \$15.00, J. E. Upton \$5.00, F. M. Thompson \$20.00, Red Cafe \$5.00, Cosmopolitan Hotel \$15.00, D. Lewis \$5.00, F. S. Kafoury \$2.50, J. A. Kerr \$5.00, W. M. Bush \$2.00, Plunkett & Savage \$10.00, S. Trone \$2.00, P. Colombo \$2.50, Scott's Grocery \$10.00, W. L. Evans \$5.00, A. Placed \$5.00, W. J. Bartlett \$5.00, Mark Sariots \$10.00, Henry Zuk \$5.00, H. Upman \$2.50, Blairmore Hardware Co. \$5.00, Paul Charlton \$10.00, Blairmore Cafe \$5.00, A. Brunetto \$5.00, Alex Cameron \$5.00, W. Bell (Coleman) \$25.00, P. Burns & Co. \$10.00, Dr. J. BLAIRMORE, UNITED CHURCH
Rev. J. W. Smith, Pastor

Serve the Church that the Church may serve you.

Services for Sunday, September 4.

The Pastor will be in charge:

MORNING SCHOOL at 11 o'clock.

AFTERNOON SCHOOL, 2 o'clock.

EVENING WORSHIP at 7:30. A special "Flower Service" will attract everybody, young and old. Friends of the congregation are asked to bring gifts of flowers and the loan of flowering plants is invited. Will you help us make the Church lovely with flowers and plants. Bring or send them on Saturday afternoon or Sunday day.

The Minister's message will be gathered around Edgar Alan Guest's poem: "God Must Have Loved Us."

This "Flower Service" will be largely a musical service. The Senior Choir will lead the Service of Praise, and will be assisted by others who have kindly offered their services.

We are glad to welcome our Senior Choir back after their holiday.

This service does not take the place of the usual "Harvest Home," which has been set, for September 18th.

ANNOUNCEMENTS

Do not forget the Afternoon Tea and Sale of Home Cooking, to be held under the auspices of the Senior Choir on Saturday, September 3rd, from 3 to 6 p.m., at the Elks' Hall. Every body welcome.

Our first "Church Night" will be held on September 14th, not September 7th, as first announced.

Mr. Smith will be away from Monday night to Friday morning of next week, attending a meeting of the Presbytery at Taber.

The Ladies' Aid will re-open their activities, after the summer holidays, with a meeting in the Church on Wednesday next, September 7th, at 2:45 p.m. All members and those interested are requested to attend.

STAR, 30,000 TIMES SUN'S
SIZE EXPLODES IN

SOUTHERN HEAVENS

CHICAGO, Aug. 22.—A star of a type identical with our sun, but said to be 30,000 times as large, has just exploded in the southern sky half way up the zenith, according to a cablegram from Germany to Prof. E. B. Frost, director of the Yerkes Observatory at Williams Bay, Wis.

The explosion of the star, known as Nova Aquilae, is the first reported in two years, Prof. Frost said. No cause of the explosion can be given.

The expansion or explosion of the star was announced by Dr. Max Wolff, of Heidelberg University, and confirmed by photographs taken at Harvard Observatory.

"These actions," Prof. Frost said, "are believed to be due to sudden trigger-like release of inter-atomic energy, due, very likely, to the unbelievable heat of the sun's interior. Temperatures inside the stars vary from 500,000 to 100,000,000 degrees Fahrenheit."

Illustrating energy contained in atoms and what could be accomplished if it could be released and utilized, the professor said a glass of water contained enough energy to send the Mauretanian across the Atlantic Ocean and back; or it would send all the automobiles in the country from Chicago to New York and return.

"This energy, suddenly released, drives from the stars the encircling gaseous shells which reach the planets in the wake of shriveling heat.

The stars are not destroyed by the expansions; the nucleus remains and in time acquires another gaseous shell," the professor said.

"Yes."

Scottie—"Well, where is his cap?"

\$7.50; Blairmore Pharmacy \$5.00.

The surplus will be used for the purchasing of bookcases and other fixtures for the club conducted by the members of the Legion in Blairstmore.

EXAMINATION RESULTS
BLAIRMORE HIGH SCHOOL

The regular monthly meeting of the Blairstmore Board of School Trustees was held at the secretary's office on Friday night last, with Chairman Chappell and members Bebb and Pinkney present.

The minutes of previous meeting were adopted and a number of accounts, totalling around \$800, were passed for payment.

Examination returns for Grades IX.

X. and XI. were received from the department of education and pursued by the meeting. A summary of these returns follows:

Grade IX.—Twenty-three pupils

writing. Seven passed in all subjects written, namely: Ethel Cartwright,

Emma Christy, James William Ivey,

Florence North, Walter August Berg,

Mabel Nellie Verengro and Barbara Wallace. Results in various subjects were as follows: Literature, 14 passed, 2 failed; composition, 20 passed, one failed; history, 12 passed, 9 failed; algebra, 11 passed, 12 failed; geometry, 17 passed, 4 failed; general science, 14 passed, 9 failed; French, 9 passed, 4 failed. In supplementary examination, Dorothy Elsen Finneron passed.

Grade X.—Sixteen pupils writing. Three passed in all subjects written, namely: Jean Greig, Alice Hornquist, Mabel Isabel Thompson. Results in various subjects as follows: Literature, 11 passed, 2 failed; composition, 11 passed, one failed; art, 9 passed, one failed; history, 3 passed, 7 failed; physics, 10 passed, one failed; algebra, 8 passed, 2 failed; geometry, 8 passed, 3 failed; French, 11 passed, one failed; French (2), one passed, 3 failed. In supplementary examination, the following passed: Margaret Irene Chappell, Dora Eileen Ivey, Kathleen Viola Smith.

Grade XI.—Seven writing. Four passed in all subjects written, namely: John Henry Barnacal (except in French 2), Edna Mae Fisher, Eric Fred Hornquist and Frank Johnson.

Results in various subjects as follows:

Literature, 3 passed, no failure; composition, 3 passed, 2 failed; history, 5 passed, no failure; arithmetic, 6 passed, one failed; geography, 2 passed, no failure; chemistry, 3 passed, one failed; art, 3 passed, 2 failed; geometry, 2 passed, no failure; Latin, one passed, no failure; French (1), 3 passed, no failure. Supplementary passed, 2.

Upon motion, the Board decided to purchase one sixteen-swing senior equipment complete, and one three-swing junior outfit complete, cost not to exceed \$345 erected on ground, as the 1927 instalment of the playground equipment. The board plans a policy of spending from two to three hundred dollars annually until the playground equipment is complete and up to the standard.

TORONTO MAYOR ASKS FOR
ACTION ON ALBERTA COAL

With the purpose of hurrying up

the Dominion railway commissioners in making public their judgment on the advisability of lowering rail rates on coal going to Eastern Canada from Alberta, Mayor Thomas Foster, of Toronto, dispatched a letter to Premier W. L. Mackenzie King.

In his letter, Mayor Foster points out that the people of the province of Ontario are desirous of obtaining a supply of Alberta coal for domestic consumption. The letter says, in part:

"As the season is rapidly approaching to the period when the railways operating in the northwest provinces will be pressed to the utmost of their powers to provide sufficient equipment to move the grain crop of the year, coal is to be brought from Alberta this year for the coming winter's requirements in the event of the commissioners determining such a rate as may solve the difficulty.

Calgary Scotchman—"Are you the man who saved my little boy from drowning at Bowness when he fell into the water?"

"Yes."

Scottie—"Well, where is his cap?"

\$7.50; Blairmore Pharmacy \$5.00.

The surplus will be used for the purchasing of bookcases and other fixtures for the club conducted by the

members of the Legion in Blairstmore.

THEY ALL ADVERTISE

A hen is not supposed to have much common sense or tact, Yet every time she lays an egg She cackles forth the fact.

A rooster hasn't got a lot Of intellect to show, But none the less most roosters have Enough good sense to crow.

The mule, the most despised of beasts,

Has a persistent way

Of letting folks know he's around By his insistent bray.

The busy little bees they buzz,

Bulls bellow and cows moo,

The watchdogs bark, the ganders quack,

And doves and pigeons coo.

The peacock spreads his tail and squawks,

Pigs squeal and robins sing,

And even serpents know enough

To hiss before they sting.

Mrs. E. Crayford, of Lundbreck, died on Sunday, August 21st, following a brief illness. She is survived by a husband and three children. The remains were laid to rest on Tuesday in the Livingstone cemetery.

Saturday's issue of the Lethbridge Herald did not make mention of a single Lethbridge court case, still there are five to one that there is in any small town in Southern Alberta. Someone is busy enough to give the Herald information of court doings at Blairstmore and the publication of same is not tending to increase the popularity of the Herald as a daily. At a recent session of the weekly press associations of Canada, it has been urged to as far as possible suppress petty court news. The weekly press is abiding by this principle.

But man, the greatest masterpiece That nature could devise, Will often stop and hesitate Before he'll advertise.—Selected.

WORLD HAPPENINGS BRIEFLY TOLD

Carroll Alkens, Naramata, B.C., has been appointed director of the Hart House Theatre, University of Toronto.

The date of the conference of Provincial Prime Ministers, with the Federal Government has been set for November 3, and will probably last some days.

Four special stamps have been issued, in Japan to commemorate the fiftieth anniversary of the entry of that country into the Universal Postal Union.

Total profits made through liquor handled by the British Columbia Liquor Control Board reached \$1,913,972 for the six months' period ending March 31, it is announced.

The death of Zagoul Pasha, President of the Egyptian Chamber of Deputies and National leader, is announced in a cable despatch to the Exchange Telegraph Company.

At a meeting of the Canadian Aero model Association held in Toronto, the present state of aviation in Canada and plans for placing the country in a forward position in this respect were the feature topics of discussion.

Future long distance flights should have far better preparation and more stringent requirements than the Doce air race to Hawaii, according to U.S. Department of Commerce aviation officials.

Proposals for the establishment of two grain elevators and a flour mill at Victoria by a Buffalo-Vancouver syndicate, were considered recently at a special meeting of the city council. The combined cost would run to nearly \$3,000,000.

The erection of a mooring mast in the vicinity of Montreal to accommodate the transatlantic airships will be followed by providing similar facilities on the Pacific coast, according to a prominent Government official in touch with plans for connecting the far-flung portions of the Empire by airship routes.

Why Churchill Is Favoured

Many Adventures Offered By North-
ern Port Over Nelson

Points in favor of Port Churchill as the terminus of the Hudson's Bay Railway, are outlined by General Patterson, president of the On-to-the-Bay Association as follows:

Twenty-four hours unshaded ad-

Absolute protection from wind and waves.

Available for ships of any draft. Great saving in cost of construction.

Can be completed many years sooner than Nelson.

No light ships or buoys required as entrance is direct from deep water into harbor.

Insurance rates should be less.

There should be a very great saving in ships' time which is most important when a short season is taken into consideration.

Harbor is large enough to handle considerably more shipping than now enters the St. Lawrence, and the extension of dock facilities can be made at very small cost.

It seems to be the case that the shore ice is clear at Churchill sooner than at Nelson, owing to the southward current on the west side of the Bay, and there would be no difficulty in keeping the harbor open with ice breakers as long as may be desired.

These are some of the advantages; the only disadvantage is the maintenance and operation of ninety additional miles of railway.

A New Sailing Record

The two-masted schooner Mary Elizabeth recently arrived at Providence, Rhode Island, from Brava, Cape Verde Islands, after making the voyage of 3,600 miles in forty-two days. The remarkable feature of the voyage, however, was not the time consumed but the fact that during the entire passage all her nine sails were set and not once was one lowered or reefed. The veteran mariners of Providence port say that such a record was never before made and that the voyage is unique in the annals of transatlantic navigation.

Harshest Way Is Best

"The harshest way is almost invariably the best way," says Thomas A. Edison, and he goes on to declare that whenever he achieves a result quickly and easily he always distrusts it and proceeds to test it by a different and more difficult method. The road to the heights must be steep and toilsome.

Money is a thing that is easy to borrow when you don't need it and almost impossible to borrow when you do.

Largest Indian Rock Carving Discovered

Petroglyph On Cariboo Highway More
Than 250 Feet Long

The largest petroglyph or Indian rock carving known in Canada has just been reported to the archaeological office of the National Museum at Ottawa.

This petroglyph is said to be more than 250 feet long and to be carved on a vertical face of reddish rock on the plateau, straight up the side of the Fraser River valley, about half a mile south of the campsite of the Alexander Bridge on the Cariboo Highway. A trout-fishing trail runs up in its direction, from which it probably can be seen. The place is only about 12 miles from Yale on the railway line, and being both the largest and the most easily accessible of the petroglyphs, it may be set aside as a national monument because of its value as a tourist attraction.

Previous to this discovery the largest known petroglyph in Canada was on the west side of a 70-foot cayucu about one mile south of the Mackenzie highway, at a point some four miles from the sea in the "Norway of Canada" near Bella Coola.

Automobile Fatalities

Report Of Deaths In Nine Provinces For 1926

The Dominion Bureau of Statistics has issued a special report on deaths from automobile accidents in the nine provinces of Canada during 1926. Under this title were included the accidents in which automobiles were involved in collision with other vehicles, such as horse-drawn vehicles, streetcars and trains.

In 1926, the total number of Canadian deaths from automobile accidents totalled 605 for the year 1925, made up as follows: Prince Edward Island, 1; Nova Scotia, 23; New Brunswick, 11; Quebec, 133; Ontario, 422; Manitoba, 27; Saskatchewan, 21; Alberta, 33; and British Columbia, 60.

For the whole country the death rate from this cause was 6.5 per 100,000 population.

Children under 15 years of age contributed 158 deaths or 31 per cent. of the total.

An Attractive New Frock

Of decided appeal is this charming frock. The skirt, having the fullness shirred in the front, is joined to the bodice, while the back is in one piece, with a wide belt. The bodice is fitted for the convertible collar, the sleeve puffs, belt across the back, and is applied on the lower part of the bodice. The bodice is made of material, matching in a chevron bow in front. View B of the frock has short sleeves of contrasting material and a round neck. No. 151 is ten inches in armhole measurement, 16 in 18 and 20 years. Size 15 (36 bust) requires 4 yards 29-inch, or 2½ yards 54-inch plate material, and ¾ yard 29-inch contrasting material for belt and ½ yard for View B. Price 20 cents each.

The designs illustrated in our new frock book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy, will find her desires fulfilled in our patterns. Price of the book 10 cents each.

SOLOMON'S WISE CHOICE

Golden Text: "Happy is the man that findeth wisdom, and the man that getteth understanding."—Proverbs 3:13.

Lesson: 1 Kings 3:4-15.
Devotional Reading: Proverbs 8:12-19.

Explanations and Comments

I. Solomon's Wise Choice, verse 4-5. Solomon has died and Solomon has been anointed king. Solomon went in state to Gibeon, presumably in the first year of his reign, accompanied by a vast retinue. Gibeon was a great high place, that is, a Canaanite sacred spot, or place for sacrifice, located upon a hill-top. The Israelites had a very strong aversion to the worship of Jehovah. The God of the Deuteronomy 12:19-21 forbade worship at high places, but worship at high places was practiced until the time of Hezekiah, 2 Kings 18:4.

Although the ark stood in a temporary tent at Jerusalem, Gibeon is called the hill-top because of the tabernacle, the ancient tent of the wandering. There, in front of the tabernacle stood the brazen altar for offerings. On this altar Solomon offered a thousand victims. He wished to display his royal munificence to his great assembly. That night while the sacrifices were being offered, smoke and noise had caused Solomon to sleep, and in a dream Jehovah appeared to him and said, "Ask what I shall give thee."

"Still, earth grows hard with facts and fear."

Stark life were but a sorry scheme."

Lord of the everlasting years,
Give! Then the dreams and his dream!"—Nancy Byrd Turner.

In answer Solomon spoke of his father David's uprightness of heart and God's promises to him, and spoke of the great service of David as a great kindness shown to his father compare 1 Kings 1:48. Then he spoke highly of himself: "I am but a little child." In reply, Josephus says Solomon was only twenty years old on his accession to the throne, but we know from 1 Kings 11:42 and 14:21, that he was already married. The reason for this is that Solomon was about twenty years old. "I know not how to go out or come in," he added, making use of a proverbial expression which means that he did not know how to conduct public or military affairs. With customary oriental exaggeration, Solomon thus acknowledged his lack of experience in his royal task of the greatness of the task before him. Compare Jeremiah 1:6-8.

Russians Inhabit Wrangell Island

Have Erected Several House Reports

U.S. Scientific Expedition

When the year Northern Light, bearing Capt. R. B. Peary and Mr. Mandeville, and his field manager, passed through the Arctic on a scientific expedition, arrived at Wrangell Island that the island had been inhabited by Russians, who had erected five large and several small houses near Rogers Bay. Wrangell Island has been claimed at different times by American, British and Russian colonists.

The eyes of a frog, when exposed to the light of a candle, will generate an electric current easily measured on a galvanometer.

Opening For New Industry

Climate Particularly Adapted For
Raising Rabbits For Their Pelts

The use of rabbit fur for commercial purposes is becoming increasingly prevalent and will doubtless continue to do so. Rabbit skins are being used more and more extensively to replace higher priced furs both in Canada and the United States. In a bulletin on "Rabbits," distributed by the Publications Branch, Department of Agriculture, Ottawa, the striking fact is mentioned that the world's annual production of rabbit skins at the present time is near the 200,000,000 mark. Canada's share is about 100,000,000 of thousands of these skins every year.

Except for use as trimmings or for children's cheap furs, rabbit furs are only substitutes for, or imitations of the higher grade and better wearing furs; consequently, the price paid for individual rabbit skins will probably never be very high. However, the price paid for prime-rabbit skins—skins of animals killed during the winter—is such that, plus the amount realized for the meat, there is a good margin of profit over the cost of feeding. There is, at present, a good market for rabbit skins in the Montreal Fur Sales.

These facts show that there is a field for rabbit breeding in Canada. Our climate is particularly adapted to the industry if given proper care and management and the selection of suitable breeds, as described in the bulletin, as a side line either on the farm or in the back yard, should prove to be an appreciable source of revenue.

In the Matter Of Public Health

Greater Things May Be Accomplished
In the Future By United Effort

One of the most unusual instances of the very advanced attitude of the average Canadian in matters of public health was brought to the attention of citizens generally during the recent provincial election campaign in Manitoba.

Interest in the subject of communal well-being was sufficiently widespread for one candidate, Dr. E. W. Montgomery, a Bracken supporter, to make it one of the chief planks in his platform.

"It is not money in the bank or wheat in the granaries or cattle in the field that makes a country great," Dr. Montgomery said in the course of his campaign. "It is the quality and character of its men."

Pointing to the achievements of the past few years, he used them as examples of the greater things which might be accomplished in the future by united effort. Death rates from tuberculosis and diphtheria had both been reduced, largely because the community was getting infectious diseases under control. But there was no reason, he noted, why the deaths from diphtheria could not be reduced to zero.

The major possibilities of health movements had not been partially exhausted. They were, he emphasized, essentially people's movements and it was essential that the average citizen should be kept in close touch with public health and hygiene problems.

Turns On Flood Lights

Drone Of Aeroplane Motor A Thousand
Feet In The Air, Closes
Switch

The noisy hum of an aeroplane a thousand feet in the air closed the switch that lighted a bank of flood lights at Bettis Field, McKeesport, Pa., in the first demonstration of the sound-sensitive automatic lighting agency developed by H. T. Spooner, research engineer of the Westinghouse Electric and Manufacturing Company. Merle Northrup, pilot attached to Bettis Field, completed the experiment by bringing the plane to the ground in the glare of powerful lights turned on by the steady throb of the ship's motors.

The device in effect uses the drone of the plane to control electric energy. From a tiny circuit at first, the controlled energy is increased in power by amplifiers until it is strong enough to throw a good sized lighting switch.

The switch locks automatically and the lights remain on until the switch is thrown by a field attendant.

Viscount Deerhurst was the eldest son of the 9th Earl of Coventry and was in his 62nd year. He was a member of the National Rifle Association Council.

"Can you stand on your head?" asked a patronizing visitor of the youngest boy of the family.

"No," was the reply. "It's too high up."

And money is often the root of many a family tree.

PREMIER BALDWIN LEARNS TO DRIVE LARGEST LOCOMOTIVE IN BRITISH EMPIRE

6120

The Rt. Hon. Stanley Baldwin, the British Premier, took a short course in engine driving at Pickering, Ontario, on the Canadian National locomotive, number 6120, the largest and most powerful railway engine in the British Empire. Mr. Baldwin, when visiting Kincardine, Ontario, although busily engaged in the opening of his new hotel, had time to make an inspection of the engine, eventually climbing into the cab with the engineer. He showed the keenest interest in the manner in which the big locomotive was handled when travelling at high speed, and worked the various levers controlling the engine. "It is a wonderful piece of machinery and should be a credit to the Canadian engineers," said Mr. Baldwin on leaving the locomotive. No. 6120 is one of a family of engines of similar type that are being built out on this site for the fast passenger and freight services of the National System. When in regular service they will run 614 miles without change—the longest locomotive runs in the Dominion.

CHAPTER VII.—Continued

It is strange what a financing word "parent" can be when uttered by some people. It seems to impinge all the crawling unscrupulousness that the dependence of the poor, starved in cumbent whose wretched existence hangs on the whim of some drunkard and dissolute squire.

What right has a person, who should be meek and apologetic, to look like this young chap, who had the physiques of a light-weight boxing champion. Magistrate Wldasor, late of Stockton-on-Tees, having this conception, though perhaps unconsciously, in his mind, looked upon the Reverend Edward Terry with extreme ill favor. There was also the sudden antagonism of the administrator of the law, who represents clerical interference, particularly from the person he called "Parson." Let the church mind its own business!

Mr. Terry, reared in the new school of thought, would have stoutly insisted that he was maintaining his business as a minister when longer after the attack he was still in his dock.

"I am here to get permission to see her," the minister said; "the girl has no relations nearer than Finland; she is only seventeen, and she bears an excellent record."

"Well, Sir, she will have to learn to respect an officer of the law. These foreigners have no respect for the King's uniform, and I take it as my duty to teach them. I don't know or care anything about her record. She may have attended chapel three times a day and gone to the penitent bench, if you still use one; and maybe she can recite versets; but she can't knock one of my men down-stairs and get away with it—that's all. And besides, can you tell me why a girl with a splendid record should be found in the worst Chinese joint in the city, and have a box of heroin tablets in her hand when arrested? I would like to hear your explanation of that."

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel very tired, and have no appetite. I was a awful sick month, too, having had a bad cold, and I had to stay in bed until sometimes I was obliged to stop working. A friend advised Lydia E. Pinkham's Vegetable Compound, and I found it most wonderful. I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year, and recommend it to all. —DONALDA FANTZER,

Ayer's Cliff, Quebec.

"Unable to Work"

Canning, Nova Scotia.—"I had irregular periods and great suffering at the time of the pains, causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through the use of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the trouble being completely relieved."

LAURA E. EDWARDS, Canning, King George, Nova Scotia.

W. N. U. 1926

experiences in the great open spaces of life, where they had carried on ancestral careers in their chosen profession.

Belle Summers was industriously knitting a sock of indistinct and neutral color. The sock had been a long time on the way, for Miss Summers worked at it only intermittently, and then only during her periods of incarceration. When the bright flower of liberty bloomed for her again, which it always did when she paid her fine, Miss Summers' plans had no place in them for the dull task of knitting.

Miss Summers had been brought in the night before, slightly under the influence of liquor, so descended that her "Kleen" was brought to her first thing in the morning.

Not so her companion, Miss Fay Sharp, who still occupied one of those couches.

"It's grand to have a whale to rest," she said, yawning luxuriously. "Good Heavens! what with this one and that one—'Fay here and Fay there'—I never gets a minute to myself until when I comes in. Good mornin', darlin'—this to the matron—"Grown-up" younger you are—very tolme I comes I sees it. Faith, ain't it good to be in a nice aley job, and police-men all over the place, to step out wit' Some women has all the luck. Some gets the roses and some gets the thorns, as poor mother often said—God rest her soul. A decent woman she was, and never thought she'd see her darlin' Fay having to work her day's work."

Miss Sharp turned her face to the wall and wept noisy.

"Wooper up," said Miss Summers, unfeeling, "it don't 'urt on one. Do you know there is a new one come in? Oh, Lord, just step out, you, and you're ready, and you—somehow I winged good old Watt, won't you?"

Miss Summers laughed remissively. "I was innocent that time, and though, and they sent me down. They always fight first. But, Lord! a person soon learns. She'll learn, Fay, Fay, it's too bad for the little thing to be left in there lonely, and us, waitin' to kick 'er company out 'ere, and givin' her lots of advice. Life is hard on the young ones, Fay, until they learn. It don't take long, either. Step up, Fay, and dry your eyes, and tidy up a little bit. We'll get the old girl to let her out; a nice young girl, smart and spunky, would be 'andy for us now, and 'er's the place to get them. I kin Clara, too, you see, and she's a good woman, and you could be good to her, too."

At that the minister's temper broke into a thousand pieces, but his voice was well under control. "Surely those are strong words to come from an administrator of the law," he said quietly. "Have we no law to deal with offenders that we must resort to mob rule? Year peace, Sir, as a magistrate, is to exonerate the innocent quite as much as to punish the guilty. Yet here you are, prejudiced against the girl, before you even see her."

"Oh, I saw her, kicking like a wild steer and snapping like a mad-turtle! I saw her, all right. Well, I see no objection to your seeing her. Flinn are naturally red, and I don't trust them."

"Surely, you cannot describe a whole country in one word?"

"Can't I? Being a minister doesn't give you much chance to know your fellowmen. I see them here in the raw; the veneer is all off when they come here. I know them, and in every case the women are the worst."

An officer was called to conduct Mr. Terry down-stairs and through a winding hallway, where their feet stuck gamely to the damp linoleum. The light was murky and dim, filtering down through narrow squares of muddy glass in the floor above, and the air was old and dead.

Past many narrow doors they went, each with a round hole from which observation might be taken of the occupant, who was not even to have the poor solace of solitude. All the agony of loneliness and desolation was his, but not the dignity.

Stopping at the last door, the officer produced a key from his waistcoat pocket and opened the door. Helmi emerged from the pallet on which she had been lying and faced the intruder. Her eyes were red and swollen; her hair disheveled, her gingham dress sadly crumpled, and one sleeve was gone. But her eyes gleamed with defiance. When she saw the friendly face of the minister she seized his hand impulsively and kissed it—much to his embarrassment.

"Take me out," she cried, breaking silence for the first time since her arrest. Her eyes filled with tears. There was a sudden temptation to tell all to this man, whom she knew to be her friend. She was desolate, distressed and bewildered. He would know. Then came a stifling. Helmi choked back her sobs and stood erect.

"Won't you tell me, Helmi?" asked Mr. Terry.

Helmi shook her head.

"You are a brave girl," he said.

Outside, in the common room, the liberty of which Helmi would have had if she had been an ordinary first-class prisoner, who had not resisted arrest, two frequent guests sat waiting away the hours comparing their

experiences in the great open spaces of life, where they had carried on ancestral careers in their chosen profession.

Belle Summers was industriously knitting a sock of indistinct and neutral color. The sock had been a long time on the way, for Miss Summers worked at it only intermittently, and then only during her periods of incarceration. When the bright flower of liberty bloomed for her again, which it always did when she paid her fine, Miss Summers' plans had no place in them for the dull task of knitting.

Miss Summers had been brought in the night before, slightly under the influence of liquor, so descended that her "Kleen" was brought to her first thing in the morning.

Not so her companion, Miss Fay Sharp, who still occupied one of those couches.

"It's grand to have a whale to rest," she said, yawning luxuriously. "Good Heavens! what with this one and that one—'Fay here and Fay there'—I never gets a minute to myself until when I comes in. Good mornin', darlin'—this to the matron—"Grown-up" younger you are—very tolme I comes I sees it. Faith, ain't it good to be in a nice aley job, and police-men all over the place, to step out wit' Some women has all the luck. Some gets the roses and some gets the thorns, as poor mother often said—God rest her soul. A decent woman she was, and never thought she'd see her darlin' Fay having to work her day's work."

Miss Sharp turned her face to the wall and wept noisy.

"Wooper up," said Miss Summers, unfeeling, "it don't 'urt on one. Do you know there is a new one come in? Oh, Lord, just step out, you, and you're ready, and you—somehow I winged good old Watt, won't you?"

Miss Summers laughed remissively. "I was innocent that time, and though, and they sent me down. They always fight first. But, Lord! a person soon learns. Life is hard on the young ones, Fay, until they learn. It don't take long, either. Step up, Fay, and dry your eyes, and tidy up a little bit. We'll get the old girl to let her out; a nice young girl, smart and spunky, would be 'andy for us now, and 'er's the place to get them. I kin Clara, too, you see, and she's a good woman, and you could be good to her, too."

At that the minister's temper broke into a thousand pieces, but his voice was well under control. "Surely those are strong words to come from an administrator of the law," he said quietly. "Have we no law to deal with offenders that we must resort to mob rule? Year peace, Sir, as a magistrate, is to exonerate the innocent quite as much as to punish the guilty. Yet here you are, prejudiced against the girl, before you even see her."

"Oh, I saw her, kicking like a wild steer and snapping like a mad-turtle! I saw her, all right. Well, I see no objection to your seeing her. Flinn are naturally red, and I don't trust them."

"Surely, you cannot describe a whole country in one word?"

"Can't I? Being a minister doesn't give you much chance to know your fellowmen. I see them here in the raw; the veneer is all off when they come here. I know them, and in every case the women are the worst."

An officer was called to conduct Mr. Terry down-stairs and through a winding hallway, where their feet stuck gamely to the damp linoleum. The light was murky and dim, filtering down through narrow squares of muddy glass in the floor above, and the air was old and dead.

Past many narrow doors they went, each with a round hole from which observation might be taken of the occupant, who was not even to have the poor solace of solitude. All the agony of loneliness and desolation was his, but not the dignity.

Stopping at the last door, the officer produced a key from his waistcoat pocket and opened the door. Helmi emerged from the pallet on which she had been lying and faced the intruder. Her eyes were red and swollen; her hair disheveled, her gingham dress sadly crumpled, and one sleeve was gone. But her eyes gleamed with defiance. When she saw the friendly face of the minister she seized his hand impulsively and kissed it—much to his embarrassment.

"Take me out," she cried, breaking silence for the first time since her arrest. Her eyes filled with tears. There was a sudden temptation to tell all to this man, whom she knew to be her friend. She was desolate, distressed and bewildered. He would know. Then came a stifling. Helmi choked back her sobs and stood erect.

"Won't you tell me, Helmi?" asked Mr. Terry.

Helmi shook her head.

"You are a brave girl," he said.

Outside, in the common room, the liberty of which Helmi would have had if she had been an ordinary first-class prisoner, who had not resisted arrest, two frequent guests sat waiting away the hours comparing their

experiences in the great open spaces of life, where they had carried on ancestral careers in their chosen profession.

Belle Summers was industriously knitting a sock of indistinct and neutral color. The sock had been a long time on the way, for Miss Summers worked at it only intermittently, and then only during her periods of incarceration. When the bright flower of liberty bloomed for her again, which it always did when she paid her fine, Miss Summers' plans had no place in them for the dull task of knitting.

Miss Summers had been brought in the night before, slightly under the influence of liquor, so descended that her "Kleen" was brought to her first thing in the morning.

Not so her companion, Miss Fay Sharp, who still occupied one of those couches.

"It's grand to have a whale to rest," she said, yawning luxuriously. "Good Heavens! what with this one and that one—'Fay here and Fay there'—I never gets a minute to myself until when I comes in. Good mornin', darlin'—this to the matron—"Grown-up" younger you are—very tolme I comes I sees it. Faith, ain't it good to be in a nice aley job, and police-men all over the place, to step out wit' Some women has all the luck. Some gets the roses and some gets the thorns, as poor mother often said—God rest her soul. A decent woman she was, and never thought she'd see her darlin' Fay having to work her day's work."

Miss Sharp turned her face to the wall and wept noisy.

"Wooper up," said Miss Summers, unfeeling, "it don't 'urt on one. Do you know there is a new one come in? Oh, Lord, just step out, you, and you're ready, and you—somehow I winged good old Watt, won't you?"

Miss Summers laughed remissively. "I was innocent that time, and though, and they sent me down. They always fight first. But, Lord! a person soon learns. She'll learn, Fay, Fay, it's too bad for the little thing to be left in there lonely, and us, waitin' to kick 'er company out 'ere, and givin' her lots of advice. Life is hard on the young ones, Fay, until they learn. It don't take long, either. Step up, Fay, and dry your eyes, and tidy up a little bit. We'll get the old girl to let her out; a nice young girl, smart and spunky, would be 'andy for us now, and 'er's the place to get them. I kin Clara, too, you see, and she's a good woman, and you could be good to her, too."

Clear to handle. Sold by all Druggists, Grocers and General Stores

Some Queer Bequests

Eccentric People Left Queen Victoria Many Peculiar Things

Cranks are fond of making bequests to eminent persons. Queen Victoria died, left by will sixty thousand dollars which had been given to her by a man who had never seen her. The signal—which is the invention of a Lowestoft man—can so easily be understood that only recently a young boy, the son of a sea captain although blindfolded, was able to bring a boat safely into harbor.

The signals are transmitted from two horns at an equal distance, on either side of the true channel. By a horn in the true channel—which is the centre—the sounds from the ship are heard clearly, but the other horn is silent.
